ORDER

Taxicab safety cameras are schedule to be in place in all Philadelphia taxicabs on or before February 23, 2015. Due to technical complications and operational limitations of both third party suppliers and taxicab owners, and upon review of the request by several Philadelphia taxicab owners, including Gene Sterin, President of 215 Get A Cab, the Taxicab and Limousine Division ("TLD") is hereby ordered to reschedule vehicle inspections conducted pursuant to 52 Pa. Code § 1017.71(b) to a date beginning after August 15, 2015.

This extension is granted in order to provide additional time for suppliers and taxicab owners to coordinate the installation of compliant camera systems. The TLD may schedule safety camera inspections at any time upon the voluntary request of a taxicab owner, but no owner shall be compelled to present a vehicle for a safety camera system inspection before August 15, 2015.
