Construction Management Services
Replace Lights on Arrivals Road
Philadelphia International Airport
Philadelphia, PA
RFP No. 15-09

The mission of the PPA is to support the region’s economic vitality through the provision of comprehensive parking, regulatory and transportation services. A focus on improved access, greater mobility, and increased vehicular and pedestrian safety are the guiding principles of our programs.

The organization employs over 1,000 people working at various locations such as 701 Market Street (HQ), Philadelphia International Airport, and various facilities located throughout the City of Philadelphia.

The PPA hereby solicits qualification statements and fee proposals from experienced construction management firms (the “Consultant”) for professional services for replacement of the existing overhead lighting on the Arrivals Road at the Philadelphia International Airport in the City of Philadelphia, PA (the “Project”). The purpose of the Project is to replace the existing HID lights with energy efficient fixtures. The source of funds for this project is the PPA’s capital improvements budget.

PPA procurement rules require the PPA to engage in a competitive process for the selection of a Consultant. Proposals received will be reviewed by a selection committee comprised of representatives from the appropriate operating divisions of PPA. The PPA anticipates awarding this contract without delay.

1. Scope of Services

The PPA operates seven structured parking garages at the Philadelphia International Airport.

Arrivals Road (aka Baggage Claim Road), runs underneath the seven parking garages from Garage A to Garage F. The road is lit with approximately 815 ceiling mounted, 400 Watt high pressure sodium, high intensity discharge lights that were installed around 1998. The location of the lights is twenty feet above the busy vehicle lanes making it difficult to maintain them. The PPA will replace all of these existing lighting fixtures with low wattage LED lights on drop pendants, and add an additional 111 lights with new conduit in order to achieve an even distribution of light on the roadway. The project has been designed and bid documents advertised for competitive bidding by qualified, single prime, electrical contractors.

The PPA anticipates that the selected Consultant will provide dedicated full time field inspection and part time office technical support personnel, sufficient to manage the electrical construction contractor.

The construction work will be performed at night between the hours of 11:00 PM and 7:00 AM. The project will begin in early April and finish the last week in June, 2015.

The Consultant will be required to inspect all of the work for conformance with the (L&I) approved plans and specifications, review the contractor’s invoices against work progress, and to make written recommendations for construction progress payments, as well as perform all other required construction phase administrative activities through punch list and close out.
The contract resulting from this RFP will commence as of the date of execution of the contract and will terminate upon completion of the work.

The Consultant’s fee shall be based upon hourly rates to a not-to-exceed maximum contract amount.

The PPA will manage the Consultant’s work under this contract. The Deputy Executive Director, or his designee, will be responsible for overseeing the activities of the successful Consultant.

2.9 Fee Proposal: Provide a proposed fee for all required construction phase administration and inspection services. The fee proposal should illustrate the anticipated level of effort by
showing the utilization of the key personnel and their hours and hourly rates. Also include a per diem rate schedule for key personnel showing the hourly billing rates of the individuals. Include a budget and unit cost rate schedule for anticipated direct expenses. The Authority will reimburse the Consultant only for actual out-of-pocket direct expenses.
